

Liquid Chromatography – Mass Spectrometry (LCMS)

Brand: Agilent 1260 Liquid Chromatography system coupled with AB SCIEX QTRAP[®] 4500 Mass Spectrometer

General Usage:

This LCMS is a bench top hybrid triple quadrupole Linear Accelerator[™] trap mass spectrometer designed for LC/MS/MS analyses. It is capable of analyzing liquid organic compounds of various polarity and molecular mass when equipped with proper columns.

Applications:

Analysis of organic compounds, in environmental, pharmaceutical and food samples
