

Policy for Professional Analytical Data Service

Policy

Professional Analytical Data Service is a data service to support the visualization and analysis of air-related data, including both observational and modeling data, which are generated by the HKUST research team at the supersite or elsewhere or collected from other data sources. The data/information are to be used for education and research purposes only, and acknowledgement of ENVF as the source of information should be put on all printed and electronic materials and publications. Prior approval from the original information provider and/or HKUST is needed for commercial or publication use. The data service is set up to promote sharing of these data in the scientific community to support atmospheric research and advancement of science. Users are always welcome to make use of the service for scientific curiosity or research projects. A fair-use user management practice is adopted for user access control, which covers the aspects from the procedure to request for use, nominal charging fees, and to publication acknowledgement requirement as described in the sections below.

Disclaimer: ENVF and HKUST (and all its staff) make no warranty or representation, expressed or implied with respect to the accuracy, completeness, or usefulness of the information contained herein and shall not have any legal liability (including liability for negligence) for any loss, damage, or injury (including death) which may result whether directly or indirectly, from the supply or use of such information.

Request for use

Users may write to webenvf@ust.hk to request the use of specific data for their research and projects. Users need to write clearly in their requests 1. the name of the users and affiliation, 2. their supervisors and affiliation, 3. the data requested and the period, 4. the purpose/nature of the project(s) or the intended use of the data. They have also to state clearly that the data are used for their research/non-commercial uses at HKUST (unless otherwise approved), and not for data resell/commercial purposes.

Charging fees

To support the maintenance of the infrastructure of the data service and as a tool to manage the fair use of the service, nominal charges will be imposed to regular heavy users. However, occasional uses at ad-hoc basis is free in order to promote the uses of the service in scientific community, and in other communities in the campus for other purposes.

Acknowledgement Requirement

Users should acknowledge the Environmental Central Facility supports on the data service in reports and publications when they make use of the service in their publications, including but not limiting to scientific papers and communications, project reports, etc.
